The following document identified in the International Search Report has been considered for the purpose of this report:

D1=KR 2000-37293 A (5 July 2000)

The present invention relates to a method for joint advertisement of member stores using advertisement materials such as discount/thank-you coupons and lottery tickets and a method for executing a thank-you event, comprising the steps of: distributing to each member store advertisement materials (e.g. discount/thank-you coupons and lottery tickets) issued in a bundle by a publicity center; distributing the advertisement materials from the member stores to their customers for free; drawing lots on a lottery date to select a winning number among the numbers in the advertisement materials; and executing a specific thank-you event to the customer having the winning number.

D1 relates to a method for managing lottery-type gift coupons using the Internet to increase the quality of customer services by managing gift coupons, which are given according to the results of transaction, conventional or electronic, at a desired time through the Internet lottery.

The following are comparisons between the present invention and the cited invention of D1: both are similar in executing the drawing process of lottery tickets or thank-you coupons distributed to customers and executing a specific thank-you event to a winner; but both are different from each other in that the present invention additionally includes the steps of distributing advertisement materials from a publicity center to member stores and then distributing the advertisement materials from the member stores to their customers for free. However, said steps are generally known in this art.

Therefore, the present invention can be readily obtained by a simple change in the design of D1. Therefore, the subject matter of claims 1-4 is considered to lack an inventive step.
